

# One-month Report

Yang Wei

# Work done

- Learn some background knowledge in ASR.
- Train some models in thchs30.
- Rearrange two new test sets, distract their features and decode them with the trained models.
- Train and test tdnn and tdnn\_discriminative model.
- Train and compare several LM with two acoustic models.
- Check 1/8 of a dictionary text.

# Dictionary check

- Check alphabetic dictionary with 20000 entries.
- 45% of the dictionary check is finished.

# Work in the future

- Finish the LM comparison and dictionary check.
- Do other jobs Mengyuan assigns to me.

Thank you
