Bimonthly Report

Zhiyuan Tang, Speech Research Group

Jan. 4, 2017

Goals in the last two months

- Joint training (speech+lang): at least a TRP

- Joint training (spk+lang): at least a TRP

- Network visualization: at least a TRP

- Mixlingual review: at least full experiments

- Random training: at least systematic review

- Replay spoofing: at least a TRP

- Multi-lingual ASR: databases, baselines

1. Systematic review
2. Full experiments
3. Technical report
4. Conference paper
5. Journal paper

Goals in the last two months

- Joint training (speech+lang): at least a TRP

- Joint training (spk+lang): at least a TRP

- Network visualization: at least a TRP

- Mixlingual review: at least full experiments

- Random training: at least systematic review

- Replay spoofing: at least a TRP

- Multi-lingual ASR: databases, baselines

- Additional document

- Delayed

- Delayed

- A review

- Abandoned

- A TRP

- Ongoing

1. Systematic review/baseline
2. Full experiments
3. Technical report
4. Conference paper
5. Journal paper

Goals in the last two months

- Joint training (speech+lang): at least a TRP

- Joint training (spk+lang): at least a TRP

- Network visualization: at least a TRP

- Mixlingual review: at least full experiments

- Random training: at least systematic review

- Replay spoofing: at least a TRP

- Multi-lingual ASR: databases, baselines

1. Systematic review/baseline
2. Full experiments
3. Technical report
4. Conference paper
5. Journal paper

- Additional document

- Delayed

- Delayed

- A review

- Abandoned

- A TRP

- Ongoing

- Kaldi: how to config nnet3 (TRP)

- Kaldi: how to train Kazak ASR (TRP)

- Kaldi: how to deploy joint training (TRP)

- Kaldi: how to extract i-vector

- Driver's distraction detection: demo, document

Goals in the next two months

- Joint training (speech+language): full experiments on new databases
- Joint training (spk+language): full experiments
- End-to-end SRE: at least a running system
- Challenge on Replay detection: complete
- Mixlingual review: at least a TRP
- Multi-lingual ASR: more databases/baselines

1. Systematic review/baseline
2. Full experiments
3. Technical report
4. Conference paper
5. Journal paper

☺

End.
